

Processing delays

Due to a significant number of re-registration filings being received just prior to the May 31, 2010 expiration of the re-registration period, the Companies Office is currently experiencing processing delays.

Once all of these filings have been processed a list will be displayed here that indicates the companies that have not re-registered.

In the meantime, please [contact the MLCI](#) directly with any questions on the re-registration process or to check on the status of any registered company as the information shown under company searches may not be up to date.
